

A secure, decentralized platform driven by cutting-edge Web 3.0 technologies!

About the platform

All-in-One Decentralized Streaming Platform

DeCinema brings together content from top streaming platforms like Netflix, Apple TV, Amazon Prime, Disney, and more, offering a one-stop destination for your favorite movies and TV shows. Say goodbye to hopping between platforms and access everything in one place with no monthly fee.

Exclusive Benefits for Premium Users

Premium users will enjoy unparalleled benefits on DeCinema. Along with a lifetime subscription to the platform, they will also get revenue shares from other users' subscriptions and platform advertisements

Revolutionary Social Interaction

Experience a new level of shared entertainment with DeCinema's groundbreaking social features. Create private or public rooms to watch movies and shows with friends or strangers. Engage in real-time chat and voice communication, making movie nights an immersive and connected experience.

Diverse and Engaging Themed Events

DeCinema goes beyond typical streaming platforms by hosting themed public events. Participate in film sessions for special occasions, enjoy content reviews with film critics, or bond over major sporting and esports events. Embrace variety and community engagement in an interactive environment.

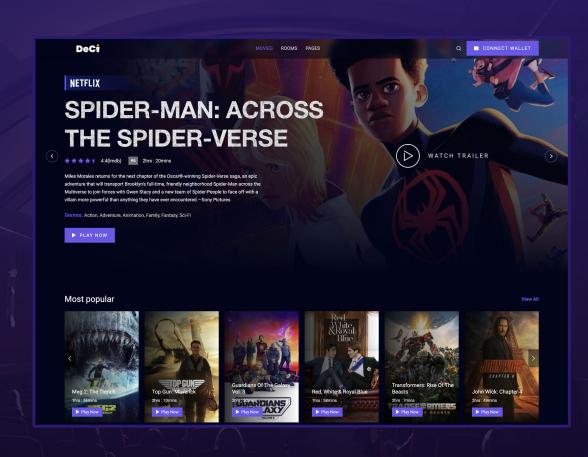

How it works?

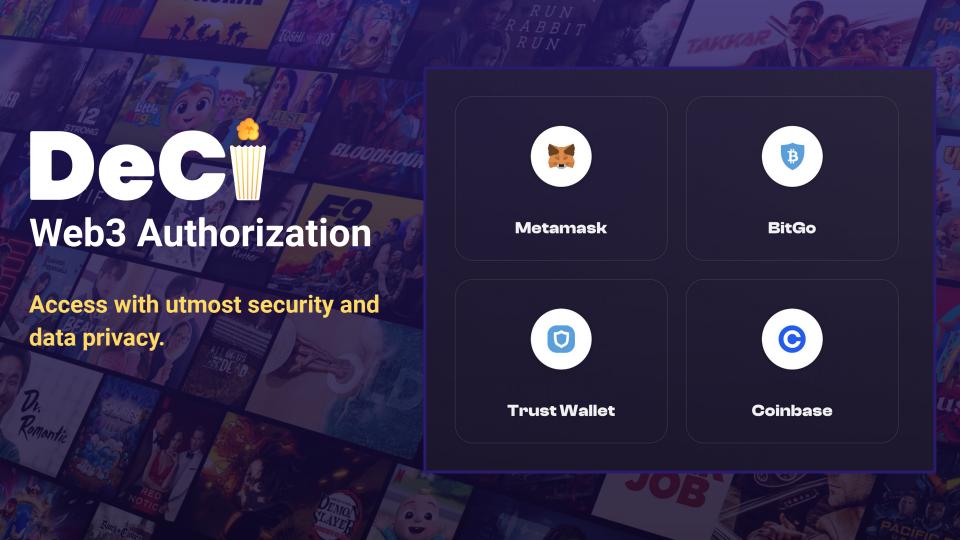

Account Content Sharing

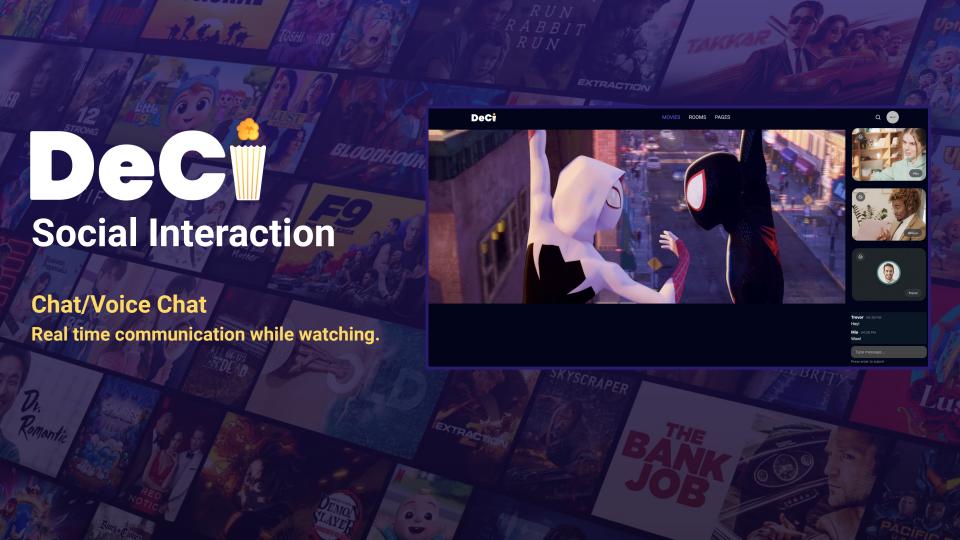

DeCinema establishes a metaverse household, enabling people to share and enjoy content collectively.

ACCOUNTS PLATFORM	MAX USERS PER ACCOUNT
HBO Max	3
Disney+	6
Netflix	3
Paramount+	3
Apple TV+	6

^{*100} accounts per streaming platform provide access fo 2100 users individuals to enjoy content.

Founders NFT

DeCinema introduces a novel approach to access and ownership through NFTs (Non-Fungible Tokens).

- Total Supply: 1000 DeCinema NFTs.
- NFT holders enjoy a lifetime subscription to the platform, granting them exclusive benefits and privileges.
- NFT holders receive a 10% revenue share from other users who subscribe to DeCinema's services.

Tokenomics

Token Name: DeCi (DeCinema)

Token Symbol: DECI Token Type: ERC-20

Total Token Supply: 1,000,000,000 DECI

Token Distribution:

- Private and Public Sale (50%): 500,000,000 DECI
- Team and Advisors (20%): 200,000,000 DECI
- Reserve Fund (15%): 150,000,000 DECI
- Marketing and Partnerships (10%): 100,000,000 DECL
- Community Development (5%): 50,000,000 DECI

Token Utility

DeCi (DECI) tokens serve as the native utility token within the DeCi platform. The primary use cases include:

Movie Watching:

- To watch one movie, users need to spend 1 DECI token (approximately 0.15 cents).
- To watch one episode of a TV series, users need to spend 0.33 DECI tokens (approximately 0.05 cents).
- Watching in 4K resolution incurs an additional 10% cost.

Group Watching:

- Users can invite friends to watch content together.
- The cost of watching is multiplied by the number of friends invited to watch the movie or series live.

Gambling:

- Users can participate in gambling activities related to predicting events in TV series.
- All bets are placed using DeCi tokens.

Revenue Model

Token Sales:

• Initial token sale during the ICO generates funds for project development.

Transaction Fees:

• A small percentage of each token spent on watching movies or series goes to the platform as a transaction fee.

Premium Features:

• Users pay an additional fee for watching content in 4K resolution.

Group Watching Fees:

• The platform charges an additional fee for each friend invited to watch content together.

Gambling Fees:

• A percentage of the bets placed in the gambling feature goes to the platform.

Governance

DeCi token holders have the right to participate in governance decisions, including voting on platform upgrades, fee structures, and other significant changes.

Dynamic Pricing:

- The price of a DECI token for content consumption on the platform is fixed and independent of its current market value.
- If the market value of 1 DECI token is, for example, 0.30 cents, a user can watch two movies with the same 1 DECI token that would have cost them 2 DECI Token during the fixed pricing period.

User Benefit from Market Fluctuations:

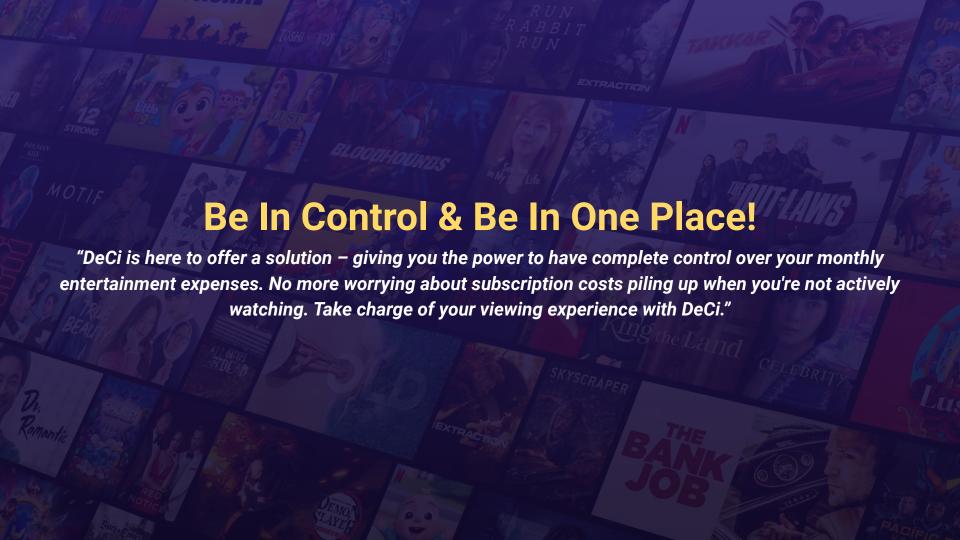

- Users benefit from market appreciation as the cost of watching content decreases when the token's market value rises.
- Conversely, during market depreciation, the cost remains fixed, ensuring stable and predictable pricing for users. Even if token price falls under 0.15 cent mark, platform still will charge 1 DECI Token for one movie.

Enhanced Affordability:

• The dynamic pricing mechanism aims to enhance affordability for users during periods of favorable market conditions.

Token Efficiency:

• Encourages token holders to take advantage of market opportunities, creating a more efficient and responsive ecosystem.

Thank You!
